RG104 E-1 Box 161

Treasury Department,

BUREAU OF THE MINT.

Washington, D. C., December 30, 1889., 188 .

The Superintendent, U.S. Mint,

Philadelphia, Pa.

Sir:

You will please make arrangements at as early a date as practicable for the removal of the silver dollars now stored in the postoffice in Philadelphia, to the new vault in your mint.

With a view to economy in the moving of the coins you will ask the United States Express Co. for a specific contract for moving these dollars, and submit the same to this bureau for approval. In addition to the silver dollars from the postoffice, some ten millions, or more, dollars should also be stored in the large vault, under the seal of proper officers of the Department and of your mint.

When you have made the necessary arrangements for the moving of the coin and are ready to commence the actual labor of weighing and storing, you will inform the bureau and I will have representatives of the Department present for the purpose of checking the weight of the coin and putting seals on the compartments.

Unless the labor can be completed before the meeting of the annual assay commission it had better not be undertaken. I presume, however, it can be completed before that time, and if so, it should be

RG104 E-1 Box 161

undertaken at once.

Very respectfully,

E. O. Leech

Director.
